

New York Botanical Garden,
Bronx Park,
New York City.

July 26, 1918.

Dear Mr. J. M. Johnston.

In my cupboard of undetermined plants I found yesterday a small package from you, which was unopened. As some of the specimens were collected on April 27, this year, I could not have had them very long, but long enough to make me ask your pardon for not having determined them sooner. My determinations are as follows:

- | | | |
|------|-------------------|--|
| 1873 | <i>Drymocalis</i> | <i>Wrangelliana</i> (Fish. & A. S. P.) Rydb. |
| 1893 | " | " " " |
| 1894 | " | " " " |
| 1892 | <i>Horkelia</i> | <i>platycalyx</i> Rydb. |
| 1887 | " | " |
| 1651 | <i>Artemisia</i> | <i>albula</i> Wooton |
| 1847 | " | <i>diversifolia</i> Rydb. |

The three first are not typical as the petals are smaller and more clearly white. There is usually the case. The last number has an unusually dense inflorescence for that species.

Yours Truly
P. A. Rydberg
